

MATERIAL SAFETY DATA SHEET

Date of issue: 12/02/2014 Date of revision: 15/06/2020 Lima MSDS N°5

According to: Regulation (EC) N° 1907/2006 (REACH)

Regulation (EC) N° 830/2015

Regulation (EC) N° 1272/2008 (CLP)

1. Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier:

Designation: NP (CaO) fertilizer suspension with micronutrients

Trade name: GRÖGREEN GEL Calciphos

EINECS name/number: Mixture – therefore not relevant IUPAC name: Mixture – therefore note relevant Molecular formula: Mixture – therefore note relevant

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Relevant identified uses: Product is used to supply nutrients to the soil or directly to the

plant

Uses advised against: Not identified

1.3 Details of the supplier of the safety data sheet:

Produced and distributed by: Lima Europe NV

Doelhaagstraat 77/1 2840 Rumst – Belgium Tel: +32 3 203 55 50 info@lima-europe.com

1.4 Emergency telephone number:

Lima Europe NV: +32 3 203 55 50 National Poison Center (BE): +32 70 245 245

2. Hazards identification

2.1 Classification of the substance or mixture:

Product description: Mixture

Classification: Eye Irrit. 2. – H319: Causes serious eye irritation

Aqua Chron. 3 - H412: Harmful to aquatic life

with long lasting effects

Classification according to Regulation (EC) No. 1272/2008

2.2 Label elements:

Hazard pictogram:

MSDS sheet - GEL Calciphos - Page 2 of 10

Signal word: Warning

Hazard statements: H319: Causes serious eye irritation (Cat. 2)

H412: Harmful to aquatic life with long-lasting effects (Cat. 3)

Precautionary statements: P264: Wash hands thoroughly after handling.

P273: Avoid release to the environment. P280: Wear eye protection/face protection.

P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy

to do. Continue rinsing.

P337+313: lf eye irritation persists, get

advice/attention.

P363: Wash contaminated clothing before reuse.

P501: Dispose of contents/container according to local

regulations.

Additional label elements: Not applicable.

Packaging requirements: Not applicable.

2.3 Other hazards:

Substance complies with criteria For PBT according to regulation (EC) nr. 1907/2006, annex XIII:

Not applicable.

Substance complies with criteria For vPvB according to regulation

(EC) nr. 1907/2006, annex XIII: Not applicable.

Other hazard that do not require

In combination with water the product can cause a slippery Classification: surface.

3. Composition/information on ingredients

Substance name	Identification	%	Classification according to regulation (EC) nr. 1272/2008 (CLP)	Type
Phosphoric Acid	RPN: 01-2119485924 EC: 231-633-2 CAS: 7664-38-2	< 55	Skin Corr. 1B – H314 Met. Corr. 1 – H290	[1]
Zinc Sulphate	RPN: 01-2119474684-27 EC: 231-793-3 CAS: 7446-19-7	< 2	Oral Acute Tox. 4 – H302 Eye Dam 1 – H318 Acute Aqua Tox. 1 – H400 Chronic Aqua Tox. 1 – H410	[1]

Type:

- Substance is classified as a physical, health or environmental hazard.
- [2] Substance with a workplace exposure limit
- [3] Substance complies with criteria for PBT according to regulation (EC) nr. 1907/2006, annex XIII
- [4] Substance complies with criteria for vPvB according to regulation (EC) nr. 1907/2006, annex XIII

Full text of Hazard and Precautionary statements mentioned above: see section 16

4. First aid measures

4.1 Description of first aid measures:

After skin contact: Wash hands immediately with an abundance of water and

soap. If skin irritation persists, seek medical advice and

attention.

After eye contact: Immediately flush eyes with plenty of water (> 15 min),

occasionally lifting the upper and lower eyelids. Remove contact lenses if present and easy to do. Continue rinsing.

After ingestion:

DO NOT induce vomiting unless directed to do so by medical personnel. Give lots of water/milk to drink. Seek medical

attention if large amounts were ingested.

After inhalation: Remove to fresh air and keep at rest in a comfortable position.

If respiratory problems occur: seek medical attention.

4.2 Most important symptoms and effects, both acute and delayed:

After skin contact: Significant effects or critical dangers are unknown.

After inhalation: Exposure to decomposition products can lead to health

problems. After exposure, serious effects can have a delayed

occurrence. Treat symptomatically.

After eye contact: Significant effects or critical dangers are unknown.

After ingestion: Significant effects or critical dangers are unknown.

4.3 Indication of any immediate medical attention and special treatment needed:

Remarks for physician/doctor: Treat symptomatically. Immediately contact a specialist for

treatment of poisoning where large amounts were ingested or inhaled. After inhalation of decomposition products produced by a fire, delayed symptoms can occur. Medical surveillance

of 48 hours is recommended.

5. Firefighting measures

5.1 Extinguishing media:

Suitable extinguishing media: Extinguish with an abundance of water.

Unsuitable extinguishing media: Do not use extinguishers based on chemicals or foam. Do not

put out the fire using steam or sand.

5.2 Special hazards arising from the substance or mixture:

Risks of the substance or mixture: Mixture is not flammable but can maintain combustion, even

in the absence of oxygen. When heated, the mixture melts and continuous heating can cause decomposition which

releases toxic fumes.

Hazardous decomposition products: Nitrous oxides

Ammonia based compounds

Phosphorous oxides

MSDS sheet - GEL Calciphos - Page 4 of 10

5.3 Advice for firefighters:

Protection during firefighting: Firefighters should wear appropriate protective equipment

and self-contained breathing apparatus with a full facepiece

operated in positive pressure mode.

Protective clothing contains: appropriate protective gloves, safety mask, goggles and clothing that provides adequate

protection for chemical incidents.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures:

For other than emergency staff: Do not attempt to take action when there is a serious personal

hazard or in case of insufficient training. Evacuate the building and surrounding areas. Do not touch spilled material. Wear

suitable protection.

For emergency responders: Wear protective gloves, clothing and eye protection. Identify

the contaminated area and keep all unprotected persons out.

6.2 Environmental precautions:

Prevent soil and water pollution. Prevent spreading in sewers. Stop leaks if possible.

If product enters drains/sewers or the environment (soil, streams, rivers, air), inform the associated

authorities.

6.3 Methods and materials for containment and cleanup:

Remove packaging from the contaminated area.

Any spillage should be cleaned up immediately. Avoid contamination of sewers, streams, soil and contained spaces. Collect as much as possible in a suitable clean container. Removal of collected spills must be done by a competent authority.

6.4 Reference to other sections:

See **section 1** for emergency contact information.

See section 8 for information on appropriate personal protective equipment.

See section 13 for additional waste treatment.

7. Handling and storage

7.1 Precautions for safe handling:

Protective precautions: Avoid contact with eyes, skin and clothing.

Do not inhale/ingest.

Store in original packaging or in approved alternative of compatible material. Keep product contained when not in use.

Do not mix with alkaline products (pH > 7). Keep away from heath or source of fire.

Emptied packaging can retain some product and can be

hazardous.

Hygiene measures: Do not eat, drink or smoke during use.

Wash hands after handling and using the product.

Remove contaminated clothing before entering an area

designated for eating.

MSDS sheet - GEL Calciphos - Page 5 of 10

7.2 Conditions for safe storage, including any incompatibilities:

Store in original packaging, protected from direct sunlight. Keep in a dry, cool and well-ventilated area.

Keep away from heath sources and open flames.

Keep away from organic materials, oil and grease.

Keep away from combustible materials and materials mentioned in section 10.5.

Store in accordance with regional and national regulations.

Do not eat, drink or smoke in the area where the material is used, stored or processed.

Product remains stable for 3 years if stored according to all provisions.

7.3 Specific end use(s):

No additional information available.

8. Exposure controls/personal protection

8.1 Control parameters:

Exposure limits:

Product name	Exposure limits	
Phosphoric Acid	Short term: 15 min STEL (short term exposure limit):	2 mg/m ³
	8-hour TWA (time weighted average):	1 mg/m ³

DNEL/DMEL:

Product name	Туре	Exposure	Value	Population	Effects
Zinc Sulphate	DNEL	Long-term Dermal	8.3 mg/m ³	Employees	Systemic
Zinc Sulphate	DNEL	Long-term Inhalation	1 mg/m³	Employees	Systemic
Zinc Sulphate	DNEL	Long-term Dermal	8.3 mg/m ³	End users	Systemic
Zinc Sulphate	DNEL	Long-term Inhalation	1.3 mg/m ³	End users	Systemic
Zinc Sulphate	DNEL	Long-term Oral	0.83 mg/kg bw/day	End users	Systemic
Phosphoric Acid	DNEL	Short-term Inhalation	2 mg/m ³	Employees	Systemic
Phosphoric Acid	DNEL	Long-term Inhalation	2.92 mg/m ³	Employees	Systemic
Phosphoric Acid	DNEL	Long-term Inhalation	0.73 mg/m ³	End users	Local

PNEC:

Product name	Туре	Detail compartment	Value	Detail method
Zinc Sulphate	PNEC	Fresh water	20.6 μg Zn/l	Assessment factors
Zinc Sulphate	PNEC	Marine	6.1 μg Zn/l	Assessment factors
Zinc Sulphate	PNEC	Fresh water deposit	235.6 mg Zn/l	Assessment factors
Zinc Sulphate	PNEC	Marine deposit	113 mg Zn/kg	Assessment factors
Zinc Sulphate	PNEC	Soil	106.8 mg Zn/kg	Assessment factors
Zinc Sulphate	PNEC	Sewage water treatment	52 μg Zn/l	Assessment factors

MSDS sheet - GEL Calciphos - Page 6 of 10

8.2 Exposure controls:

Appropriate engineering controls: If user operations generate dust, use process enclosures,

local exhaust ventilation or other controls to keep worker exposure to airborne contaminants below any recommended

or statutory limits.

Personal protective controls: If risk assessment concluded the need of protection, use

appropriate approved protective equipment:

safety glasses, face shield,

resistant gloves, protective clothing and impervious footwear,

respiratory equipment/gas mask.

Hygiene precautions: Security shower or eyewash stations must be provided at the

workplace.

Environmental exposure controls: Emissions from ventilation or work process equipment should

be checked to ensure they comply with the legislation.

9. Physical and chemical properties

9.1 Information in basic physical and chemical properties:

Physical state: High density suspension

Odor: Odorless

Odor threshold: No data available pH solution: 2.0 (1% solution) Melting point: No data available Boiling point: > 210 °C (decomposes) Flash point: No data available Evaporation point: No data available Flammability: Not flammable Explosive limits: No data available Vapor pressure: No data available Relative vapor density: Not data available Relative density: 1,63 kg/liter

Solubility: 100% soluble in water n-octanol/water partition coefficient: No data available Self-ignition temperature: No data available

Decomposition temperature: > 210 °C
Viscosity: > 3.000 cps
Explosive properties: None

Oxidizing properties: No data available

9.2 Other information:

No additional information present.

10. Stability and reactivity

10.1 Reactivity:

Product is stable under normal conditions of handling and storage.

10.2 Chemical stability:

Stable under normal conditions.

MSDS sheet - GEL Calciphos - Page 7 of 10

10.3 Possibility of hazardous reactions:

Product can react heavily with alkaline substances (pH>7) where temperature increases can occur. Do not mix with strong acids and strong bases.

10.4 Conditions to avoid:

Avoid contamination with alkaline substances, combustible materials, reducing agents and sulphates.

10.5 Incompatible materials:

Substance reacts/is incompatible with: Alkaline substances

Combustible materials Reducing agents Sulphates

10.6 Hazardous decomposition products:

Under normal conditions of handling and storage, not hazardous components are produced. With heating or burning: release of toxic and corrosive gases/vapors (Ammonia, Nitrous gases, Phosphorous oxides and Sulphur oxides).

11. Toxicological information

11.1 Information of toxicological effects:

Hazard class	Value	Method
Acute toxicity		
Oral		
Zinc Sulphate	LD50: 574-2949 mg/kg	Rat
Phopshoric Acid	2600 mg/kg	Rat OECD 423
Dermal		
Zinc Sulphate	>2000 mg/kg bw/day	Rabbit
Inhalation	No available data	
Skin corrosion/irritation	Significant effects or critical values are unknown.	
Serious eye damage/irritation	Mixture is not eye corrosive (cat 1)	OECD Guideline 437
Respiratory or skin sensitation		
Germ cell mutagenicity		
Carcinogenity		
Reproductive toxicity	Significant effects or critical values are unknown.	
Specific target organ toxicity (single exposure)		
Specific target organ toxicity (repeated exposure)		
Aspiration hazard		

12. Ecological information

12.1 Toxicity:

Significant effects or critical values are unknown.

Product name	Result	Species	Exposure
Zinc Sulphate	Acute EC50: 1,13 mg/l fresh water OECD 203	Other aquatic organisms. Daphnia	48 h
Zinc Sulphate	Acute EC50: 3,73 mg/ fresh water	Algae: Selenastrum Capricornutum	72 h
Phosphoric Acid	Acute EC50: >100 mg/l	Other aquatic organisms: Daphnia	48 h
Phosphoric Acid	Acute EC50: > 100 mg/l	Other aquatic organisms: Algae	72 h

12.2 Persistence and degradability:

Product is biologically degradable in plants and soil.

12.3 Bio accumulative potential:

Significant effects or critical values are unknown.

12.4 Mobility in soil:

Nitrate ions are mobile and ammonium ions are absorbed by soil particles. Phosphate is merely transported over short distances in the soil and are afterwards immobilized. Dissolved calcium and magnesium ions are absorbed by clay particles in the soil. Leaching of nutrients into the soil occurs in the abscence of clay particles.

12.5 Results of PBT and vPvB assessment:

Not applicable.

12.6 other adverse effects:

Significant effects or critical values are unknown.

13. Disposal considerations

Waste production should be avoided and minimized as much as possible.

Big quantities of restproducts can not be disposed through the sewers and need to be processed by an appropriate authority.

Remove waste in accordance with local and/or national regulations.

14. Transport information

14.1 UN-number:

Non-dangerous goods according to 'United Nations Recommendations on the Transportation of Dangerous Goods' (UN Orange Book) and according to international transport codes RID (railroad), ADR (road) and IMDG (sea).

14.2 UN proper shipping name:

Not applicable.

14.3 Transport hazard class(es):

Not applicable.

14.4 Packing group:

Not applicable.

14.5 Environmental hazards:

See section 12.

14.6 Special precautions for user:

Necessary caution needs to be taken into account when transporting non-hazardous chemicals.

14.7 Transport in bulk according to annex II of MARPOL 73/78 and the IBC Code:

Not applicable.

15. Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture:

15.1.1 EU regulations:

Regulation (EC) Nr. 2003/2003 of the European Parliament and of the Council of 13 October 2003 relating to fertilizers.

Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

Commission Regulation (EU) 2015/830 of 28 May 2015 amending Regulation (EC) No 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH).

Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006

15.1.2 National regulations:

Royal Decree of 28/01/2013 regarding the introduction into the market and the use of fertilizers, soil-improving agents and substrates.

15.2 Chemical safety assessment:

No chemical safety assessment has been executed.

MSDS sheet - GEL Calciphos - Page 10 of 10

16. Other information

16.1 Cause of revision:

Compliance to regulation (EC) N° 830/2015.

16.2 Full list of abbreviations and acronyms:

BW	Body Weight	
CLP	Regulation on classification, labeling and packaging (CLP) of substances and mixtures (Regulation (EC) N° 1272/2008)	
GHS	Global regulation for classification and labeling of chemical substances	
DNEL	Derived No-Effect Level	
DMEL	Derived Minimal Effect Level	
EC50	Concentration which induces a response halfway between the baseline and maximum after a specified exposure time	
Eye irrit.2	Eye irritation category 2	
Aqua Chron. 3	Aquatic Chronic toxicity category 3	
Skin corr. 1B	Skin corrosive category 1B	
Met. Corr. 1	Metal corrosivity category 1	
Oral Acute Tox. 4	Oral acute toxicity category 4	
Eye Dam. 1	Eye damage category 1	
Acute Aqua Tox. 1	Acute Aquatic toxicity category 1	
Chron. Aqua Tox. 1	Aquatic Chronic toxicity category 1	
H290	May be corrosive to metals	
H302	Harmful if swallowed	
H314	Causes severe skin burns and eye damage	
H318	Causes serious eye damage	
H400	Very toxic to aquatic life	
H410	Very toxic to aquatic life with long-lasting effects	
H412	Harmful for aquatic life with long -asting effects	
LC50	Lethal concentration where 50% of the sample population are killed after a single exposure	
PBT	Persistent, Bioaccumulative and Toxic	
vPvB	Very persistent and very bioaccumulative	
PNEC	Predicted No-Effect Concentration	

16.3 Important references and data:

Information from suppliers (MSDS and technical data sheets of raw materials). Bovine Corneal Opacity and Permeability (BCOP) test according to OECD guideline 437 by: VITO-ABS, Industriezone Vlasmeer 7, B-2400 Mol, Belgium.

16.4 Procedure used to derive the classification according to Regulation (EC) nr. 1272/2008 CLP/GHS.

Classification: Eye Irrit. 2, H319., Aqua Chron Tox. 4, H412

Justification: assessment by expert.

The information provided in this Material Safety Data Sheet is correct to the best of our knowledge, information and belief at the date of its publication and revision. The information given is designed only as guidance for safe handling, use, storage, transportation, disposal and release and is not to be considered a warranty or quality specification. The information should be used in accordance with the technical information. The information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process, unless specified in the text. The information does not redeem the user of the obligation to ensure handling according to all relevant regulations.
